I don't know much about Kenjius, but as I remember, he wanted to work with me, but his DM's just got buried by another thousand DM's, and then Kenjius got banned from my server, got mad and made that video. He said stuff like labirhin abusing his ex are just false and literally the opposite.
I broke up because I just feel like im not the right person for them, for not liking their suicide humor, or loving a school shooter guy, or the constatly needing to roleplay with very extreme detail description of feral, hyperpreg, and young age element.

(They once tried to impress me by saying lines from the postal guy before he shot his head, and bully me because I don't know what that line comes from and I don't know anything about that)

and i said one of them was hot

I even said i never did a roleplay ever, but they always forcing me like crazy (They will not start the roleplay until i pick that “kink picker menu”).

That's why I broke up with them and everyday since that day, their Emotions just changing rapidly from accepting it, then suddenly so angry and threatening me they will kill themself with a shotgun in their basement until I cry a few times.

So its like we can still be sexual to eachother but it doesnt mean we're in a relationship
i was mainly asking to see if you wanted to rp again because i miss doing that lol

I was just trying to fit in with them because at first, they were very friendly and bought me a game on steam (its buckshot roulette). but after that, they start to show what person they really are.

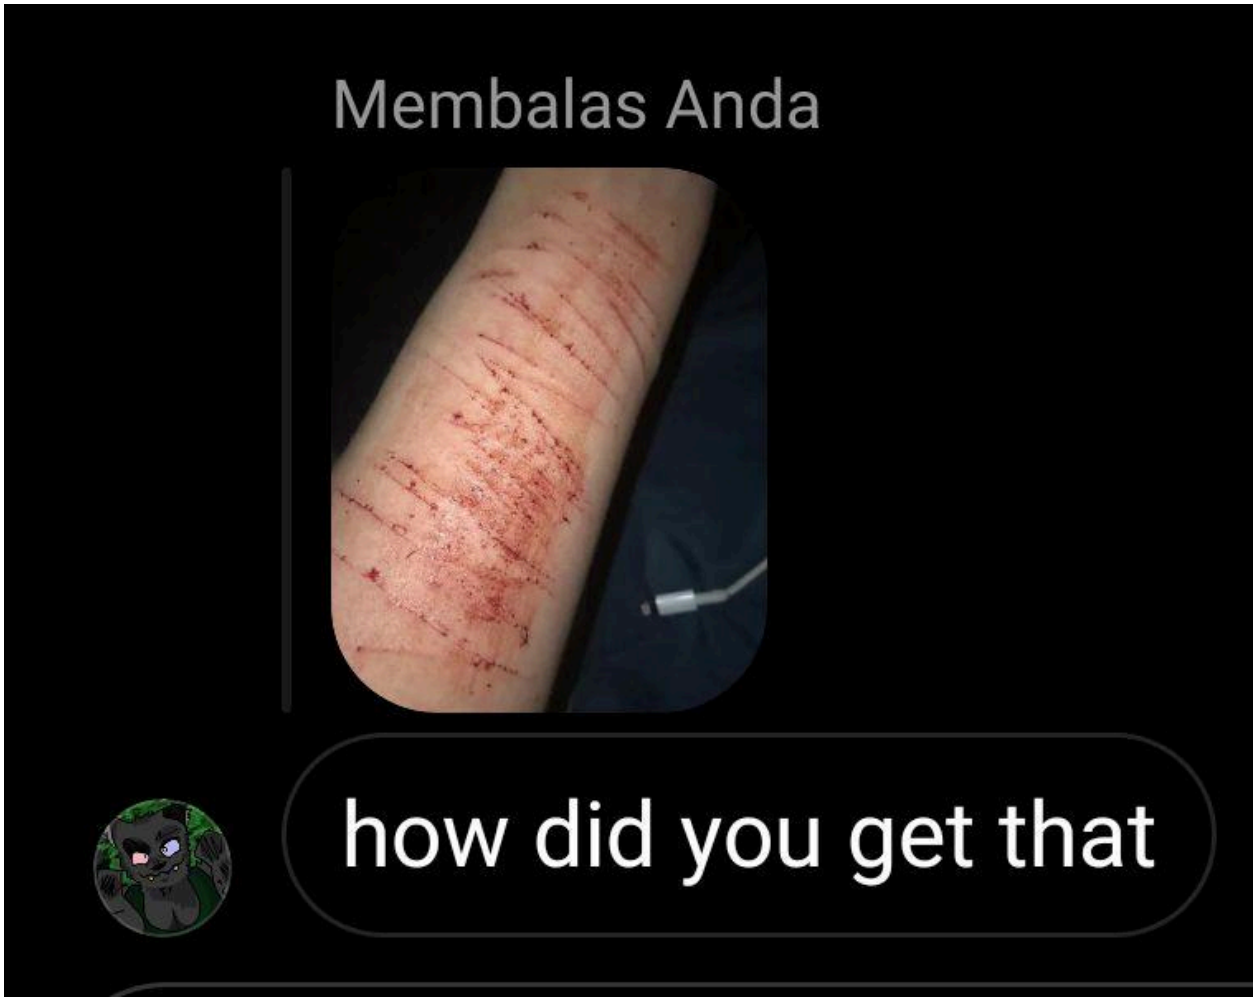
Did you dislike doing rp's THAT much?

You could've told me that when we were in a relationship 😭✌

They make some accounts pretending to be some different people and start texting me to get freaky and then using the main account to get angry because I texted their other account, and using another-another account to tell me to care for them. (i told the freaky account, i know its you) And they admitted it for the freaky account was them.
And the other account gives me a picture of their arm with a lot of cuts and sends me a gif of a meme person talking to a brick wall, but then they explain the gif with their main account.



(They pretending to be shocked for how i get that, its just their other account send it to me)

They also watch scary stuff too, like zooporn of person sex with dog and child molestation porn

i used to watch scary porn
and saw scary things

The last thing that they show me before i want to broke up is this, it makes me scared because i know those music based on reality person and im so scared of suicide stuff, i cant remove thing from my mind after i witness something real and not a vfx for film. I don't want to be in this environment because I feel like I'm being scammed from how they act the first time they text me and then change drastically to the type of person they become.

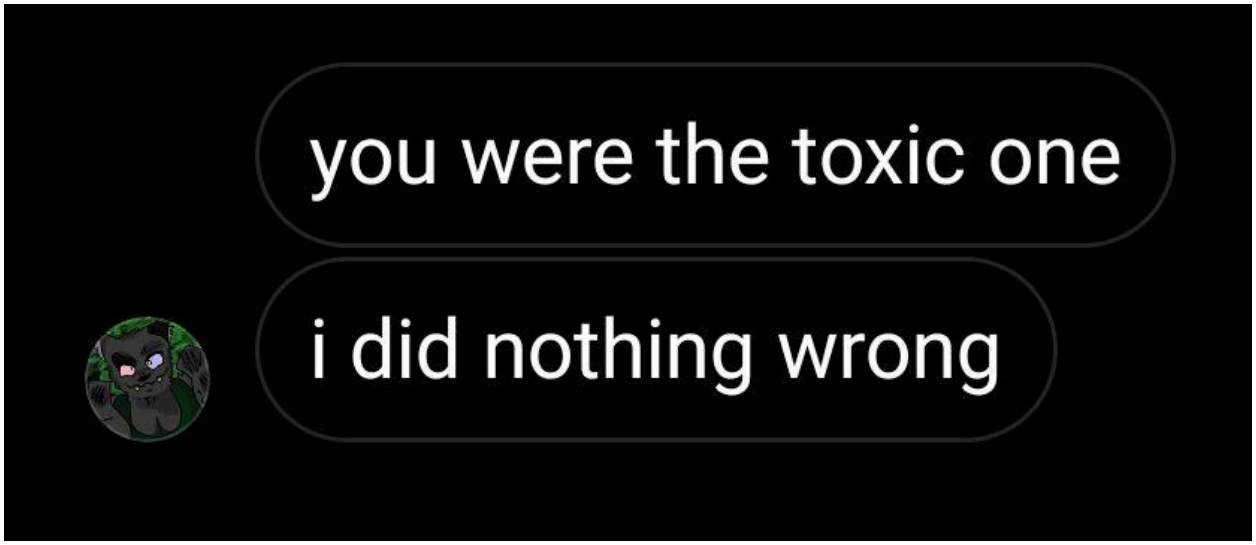
Maybe because im not from the west that i don't understand the internet culture, about these type of suicide, school shooter, and shotgun stuff are just a normal thing or not. But I don't think it's okay to be this type of person. I was new to the internet as late as 2018-2019 and I didn't know about how people can be so cruel and scary like threatening me that they will kill themselves if i do this and that. And then making misinformation about me and announcing it with bad words all over the place to make me a bad person.

And all i got is this



Thank you for reading. I hope you understand because I'm bad at speaking English, and hope you have a great day.
